

Climate Challenge for Scania

- Energy efficiency
- CO₂
- Be part of the solution

Efficiency improvements

1977

37

MWh/vehicle

litres/100 km

1992

24

MWh/vehicle

litres/100 km

2007

8,6

MWh/vehicle

litres/100 km

SCANIA

Scania reduced CO₂ emission with 8000 ton 2008

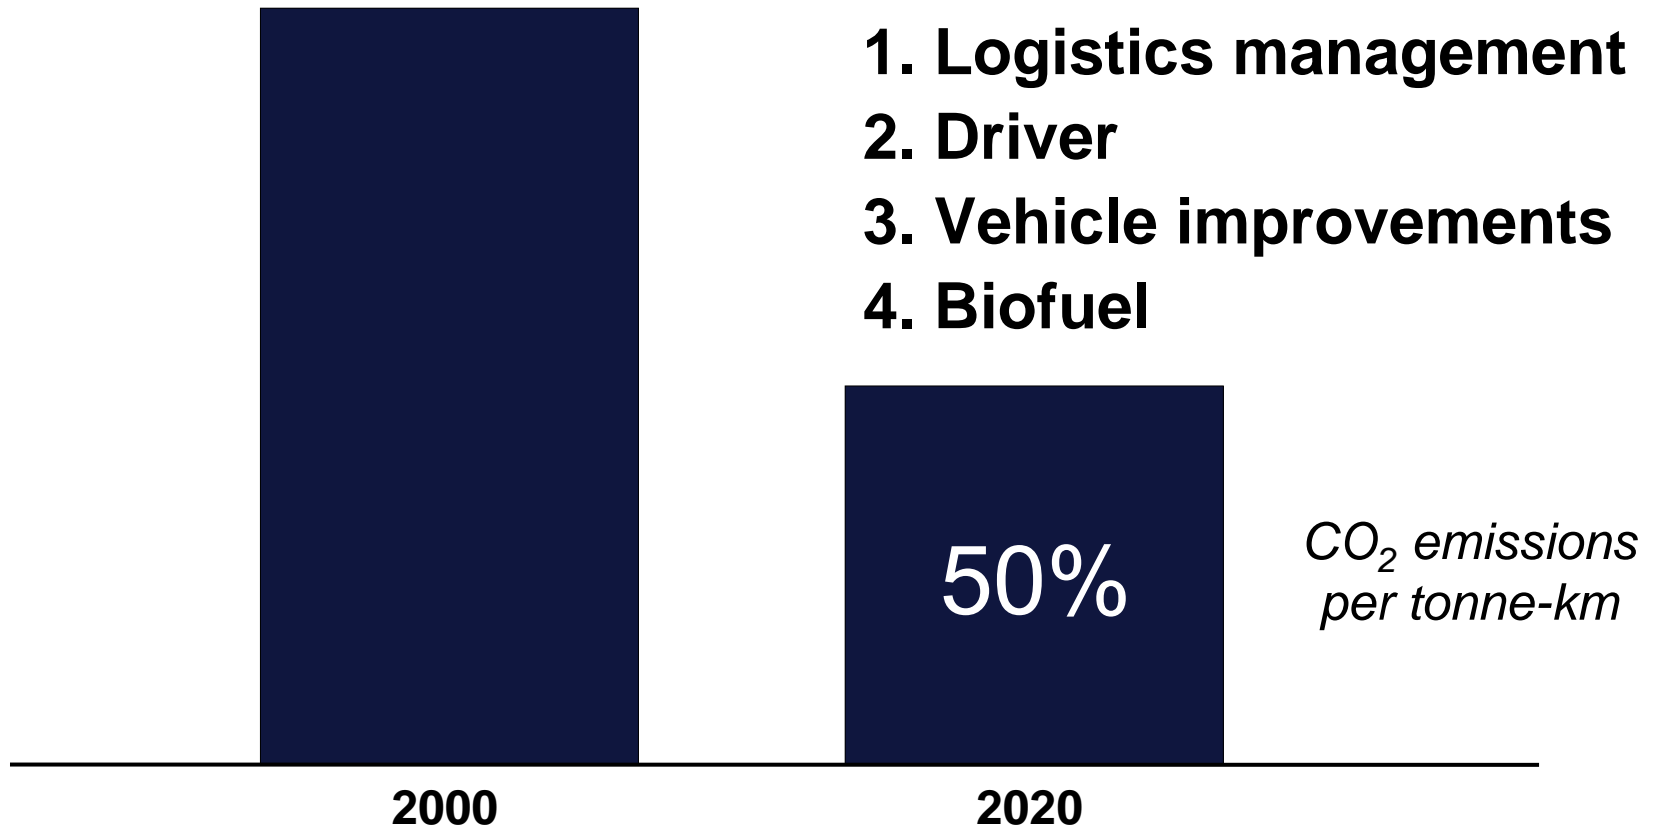

Which corresponds
to 1000 houses heated
by oil

or 1000 laps around the
globe with a normal car

SCANIA

... is also a business opportunity

Hybridisation cuts fuel consumption by 25 %

SCANIA

System thinking

- Support to logistics
- Multimodality
- Attractive public transport

SCANIA

Tackling the climate challenge

Don't wait for the perfect solution – start now!

■ Biofuels in diesel engine

■ Hybrids

SCANIA
